

UCaaS from CNP

Bring your communications and collaboration platform into the cloud for superior mobility, quality, simplicity, and reliability. UCaaS offers complete flexibility when adding new offices, users and features to easily grow and customize your communications for a true competitive advantage.

Cloud phone systems empower your employees to be more efficient and drive a better customer experience. With a focus on the mobile workforce, ease of administration, and a smaller IT footprint, UCaaS is becoming a clear option for many businesses today. Bring all of your communication tools into one cloud and one application for a seamless experience on any device, anywhere in the world.

Why UCaaS from CNP?

- CNP Technologies has helped clients design, build, implement, and support critical telephony and contact center infrastructure for **20 years**
- CNP's **proven process**, methodology, and project management approach for seamless implementation
- **Unmatched** engineering and project management team experience
- CNP CloudStart program ensures an **efficient and successful path to the cloud**

Financial Flexibility

Organizations are moving away from high upfront capital expenses and are leaning toward options that allow them to pay for only what they need when they need it.

Enhanced User Experience

Designed for the modern worker, the user experience is streamlined across devices and endpoints with easy to use interfaces, cross-launching capabilities, consolidated views and single-click functionality.

Ability to Evolve

What you buy today isn't what you're stuck with tomorrow. Never overpay for features you don't use. Add, upgrade and modify service plans as your business needs change.

Enhanced Security

Cloud-based service providers have stringent measures in place to monitor networks for known threats and potential vulnerabilities.

Robust Management Tools

Web-based management portals offer admins the ability to manage users, permissions, billing and insights from anywhere.

Employee Productivity

Cloud-based UC offers speed and ease of deployment. UCaaS makes life easier for IT staff, but the business becomes more agile when employees have the tools to work more productively.

Call Center Integration

Utilizing a cloud contact center provides agents with an easy-to-use interface allowing for seamless connection to customers. Interactions are fully integrated, call profile information is clear and performance statistics are delivered onto a single pane of glass.

CNP CloudStart Services

Ensure your business has an efficient and successful path to the cloud. CloudStart services from CNP offers dedicated project engineers, solution design sessions, equipment installation and deployment, end user training, first day live support, and a post implementation evaluation.
