

Managed IT Security Services

CNP Technologies introduces Foresite, a global service provider delivering a range of managed security services designed to help our clients meet their information security and compliance objectives

ProVision

Foresite's proprietary ProVision platform goes beyond traditional SIEM tools for full security monitoring and analysis. ProVision helps businesses manage assets, generate reports, and leverage analytics enabling them to make smarter business decisions

Managed Services

CNP and Foresite's managed security services provide the broad security expertise, continuous monitoring, dashboard visibility, and market-leading tools and processes needed keep your data and critical IT systems safe and protected.

Security Assessments

Foresite's testing and assessment services help organizations identify unknown vulnerabilities in their critical business systems that may have gone undetected, underestimated, or overlooked.

A few important assessments Foresite delivers are:

- Vulnerability and penetration testing
- Web application penetration testing
- Enterprise security risk assessments
- Third-party risk assessments

Compliance Services

Foresite and CNP offer complete solutions such as gap assessment, advisory, and audit attestations. We can help you navigate difficult compliance requirements such as PCI, CCPA, HIPAA, CJIS, SOC2, Readiness, GDPR, ISO, NIST 800, SOX, SEC, CFATS, and OCIE.
