

A Regional Commercial Contracting Company

PROBLEM

- Data Storage and Collaboration is critical to the company's success, existing technologies and solutions were becoming unreliable and hard to use.
- With an increasingly more mobile workforce, security risks were becoming hard to overcome.
- User disruption and downtime were impacting business.

SOLUTIONS

- Performed detailed needs analysis across all departments and business functions
- Recommended and implemented technology infrastructure upgrades and modernization
- Implementation of security controls, security enhancements, and network visibility

BENEFITS

- Improved user productivity
- Enabled long-term data retention for historical access purposes
- Improved security posture and security visibility
