

Fortivoice UC Solutions from CNP Technologies

Real-time collaboration for optimal efficiency

FortiVoice Secure Unified Communications, along with FortiFone IP phones, helps organizations keep up with changing communication needs due to evolving infrastructure, remote/hybrid work, and BYOD.

Fortinet's integrated platform for voice, conferencing, chat, and fax solves these challenges in a way that brings teams together for optimal organization efficiency.

- Turn your smartphone and computer into a communication hub with integrated calling, conferencing, chat, fax, and more
- Easily view colleagues' real-time presences
- Quick chat anytime with colleagues from Softclient
- Send and receive faxes from Softclient for Desktop
- Microsoft Teams integrations to enjoy quality FortiVoice calling experience within the app

Security

Recognized as a global cybersecurity leader by Gartner and others, Fortinet understands one of the top priorities for business communications is security. FortiVoice UC provides secure conversations and prevents call eavesdropping and SIP attacks with built-in security and encryption

Simplicity

Managing business communications has become increasingly complicated as companies are more geographically distributed. FortiVoice's simple licensing and intuitive interface helps to optimize administrators' onboarding experience to reduce business disruption.

Availability

FortiVoice UC enables users to make and receive calls, check voicemails, access directories, and more directly from their computers and smartphones. Users can also enjoy additional features to view colleagues' real-time presences, start a chat, and receive faxes within the FortiFone Softclient.

Microsoft Teams Integration

The FortiVoice Unified Communications solution is fully integrated with Microsoft Teams. Users can easily make calls and enjoy secure, quality conversations right within Teams. Launching the FortiFone Softclient directly from Teams opens up more options, such as accessing voicemails, checking faxes, and viewing call histories
